# Polymarket Bot Live Deployment Verification

AWS Ireland VPS (52.16.177.132) | Polymarket Global CLOB V2 | Verification Receipt

| Status Metric | Verified Value | Operational Impact |
|---|---|---|
| Deployment Host | `AWS Ireland VPS (52.16.177.132)` | Low latency to Polymarket global infrastructure |
| Daemon Service | `pmus.service (systemd active/running)` | 24/7 background process with auto-restart |
| Venue / Protocol | `Polymarket Global (CLOB V2)` | py-clob-client-v2 with DepositWallet flow |
| Collateral Balance | `90.76 USDC (Gnosis Safe Proxy)` | Fully backed with zero allowance friction |
| Active Capital Quoted | `$28.05 USD (4 active orders)` | Under $60 budget, but cap can be bypassed (see review) |
| Reward Scoring Status | **PARTIAL (2 of 4 scoring)** | Putin/Xi bids score False: tail markets need two-sided quotes |

## Active Live Orders on Polymarket Exchange

| Market / Question | Side | Price | Contracts | Capital | Scoring |
|---|---|---|---|---|---|
| Will Gavin Newsom win 2028 Dem Nom? | `BUY_LONG` | $0.155 | 50 | $7.75 | **TRUE** |
| Will AOC win 2028 Dem Nom? | `BUY_LONG` | $0.178 | 50 | $8.90 | **TRUE** |
| Xi Jinping out before 2027? | `BUY_LONG` | $0.029 | 200 | $5.80 | **FALSE** |
| Putin out before 2027? | `BUY_LONG` | $0.028 | 200 | $5.60 | **FALSE** |

## Real-Time Tracking & Verification Links

| Platform | Destination Link / Access Command |
|---|---|
| Polymarket Public Profile | `https://polymarket.com/profile/0xe7d565d58c61e2b96adb0e4518e7c33978402e7f` |
| Polygonscan Blockchain Ledger | `https://polygonscan.com/address/0xe7d565d58c61e2b96adb0e4518e7c33978402e7f` |
| Local Streamlit Trading HUD | `http://localhost:8501 (running in background on local host)` |
| VPS Ledger Synchronization | `scp -i LightsailKey.pem ubuntu@52.16.177.132:.../ledger.db pmus/data/` |

## VPS Operational Commands

| Action | Shell Command (SSH ubuntu@52.16.177.132) |
|---|---|
| Check service status | `sudo systemctl status pmus.service` |

| | |
|---|---|
| Tail live engine logs | `sudo journalctl -u pmus.service -f --no-pager` |
| Restart engine daemon | `sudo systemctl restart pmus.service` |
| Emergency stop (orders stay live, run flatten next) | `sudo systemctl stop pmus.service` |
| Flatten all open positions | `cd /home/ubuntu/polymarket_bot && ./venv/bin/python -m pmus flatten` |
